AcquaLink®

Specifications:

- NMEA 2000®, NMEA 0183, SAE J1939 EasyLink protocol
- Easy Chain
- IPX6 protection rating
- Anti-fog mineral glass lens
- Reverse polarity protection
- Operating temperature -20 °C / +70 °C
- LED Backlight technology
- NavBox Bus system
- Gateway functionality
- Engine Monitoring
- Full Navigation & Vessel Information
- REACH, RoHS Lead-Free

Portfolio:

- TFT 4.3" Display & Controller
- TFT 7" Touch Display
- Ø 110 mm, 85 mm gauges

OceanLink®

Specifications:

- NMEA 2000®, SAE J1939 protocol
- Easy Chain
- IPX7 protection rating
- Anti-fog double plastic lens
- Reverse polarity protection
- Operating temperature -20 °C / +70 °C
- 85 mm Speedo with embedded GPS module
- Gateway functionality
- Engine Monitoring
- Full Navigation & Vessel Information
- REACH, RoHS Lead-Free

Portfolio:

- TFT 4.3" Display with push-buttons
- TFT 7" Touch Display
- Ø 85 mm, 52 mm gauges

ViewLine

Specifications:

- Analog connectivity
- IP67 Front protection rating
- Anti-fog double plastic lens
- Reverse polarity protection
- Operating temperature -20 °C / +70 °C
- 9 Bezel options
- 110 mm Speedo with embedded GPS
- Full Engine Monitoring
- Vessel information
- REACH, RoHS Lead-Free

- Ø 110 mm, 85 mm, 52 mm gauges

60 years of VDO Marine.

Brand with tradition.

Since 1958, VDO Marine provides solutions for recreational boats, motor yachts and sailing yachts and with its 60 years of experience enjoys the reputation of being one of the most reliable suppliers in this sector. Since we introduced our first instruments we have earned a reputation as a leading expert for marine instrumentation. In the course of our history,

we have presented eight product lines and supplied a wide range of professional solutions to the marine industry, where VDO Marine is recognized as a brand with tradition. We have appealed to many generations of clients and we have the long-term vision to serve many more generations to come.

1958

First Marine Tachometer

In 1958, VDO has produced its first marine tachometers. One of them was built into the Riva boat of Equestrian olympic champion Liselott Linsenhoff. Boatyard owner Carlos Riva was so fascinated by its reliability that he requested to develop a special instrument for his boat. In November 1962, the myth was born: 'Acquarama', an exclusive boat equipped with brand new VDO Marine instruments! Since its presentation at the Milan International Boat Show, everybody wanted to have VDO instruments on the boat!

1977

StandardLine

After this successful path the first marine instrument line named StandardLine was introduced. Gauges were built without corroding parts, just made of plastic. Afterwards in 1981 came the first electronic compass ADIS 360 and echosounder MODIS 120 which again had been highly demanded.

1983-1991

NAVPAC & COMPACT

A further innovative development by VDO was the first bus-driven line named NAVPAC digital displays. Digital indication became a hit! In 1987, VDO released the COMPACT line, which was also having a LCD. In 1990, NAVPAC came with triumph to the market and introduced the first marine GPS gauge ever!

1960–1970

Sumlog & Wind Sensor

After its first marine gauges, VDO also developed its first marine sensors! The mechanical speedometer named Sumlog had great success and is demanded till today. In 1970, an electronic wind sensor measuring speed and direction was launched, whose successor is available even today as its functionality is just perfect!

1972

Plant expansion

Due to the growing market demand on VDO products, the company needed to expand the scope of production lines. Therefore, in 1972 VDO opened a new location in Switzerland. This Rüttli plant had since the beginning been a proud producer of marine and also automotive parts for customers like Audi, Daimler-Benz, KTM, Piaggio, VOLVO, VW and many more.

1992

LOGIC

After the big boom of digital indicators, the LOGIC line was launched, the first combined analog and digital instruments. Speed boats, sail boats – everybody wanted to have them in these modern days of the 20th century!

1996

OceanLine

After the epoch of square instruments, VDO came back with classical round gauges and introduced OceanLine, the perfect instruments for flush-mounted solutions. OceanLine has been used for many different engine manufacturers as customized gauge with own logo.

2016

AcquaLink®

An intelligent new-age system for yachts and motorboats – AcquaLink® line was launched. With AcquaLink® came also NavSensor, the gem of all sensors. NavSensor complements the inbuilt satellite receiver module to provide accurate readings of the speed of travel as well as the pitch & roll and YAW motion of the boat. Compass readings can be displayed electronically thanks to the embedded compass which also facilitates course corrections in electronic autopilots. The barometer and air temperature sensors are early indicators of forthcoming weather conditions.

2013

Expansion

2013 was a year of expansion, when VDO had hit the market again. For instance, VDO has engineered customized displays for VOLVO PENTA or YAMAHA Marine. We set the standards when it comes to marine instruments of highest quality. We create customized products and solutions that are unparalleled the world over.

VDO Marine Today.

Quality first.

The highest precision and the use of pioneering technologies are as important to us as the ease of use and appealing design. Moreover, our VDO Marine products enable optional system integration using complete solutions from a single source and specially developed components. To ensure reliability even under the toughest conditions, our marine products undergo extensive testing and quality assurance procedures. VDO Marine instruments

are the first choice for marine engine manufacturers since VDO Marine products cover the full spectrum of combination gauges, remotes, integrated systems and more, with products to suit any sailing boat or motor craft bridge. VDO Marine supplies instrumentations to the engine manufactures such as Mercury Marine, Volvo Penta, Yamaha, Honda Marine or ISUZU Marine and others.

2000

OceanLink® CAN & Smartcraft

We rise to each new challenge, making continuous advancements along the way. In the year 2000 we presented new OceanLink® CAN capable instruments, which installation follows the practical plug & play principle, with no need for complicated programming. VDO developed customized OceanLink® instruments for VW Marine, MAN Marine, VOLVO Penta, Mercury Marine and others.

2007

ViewLine

In 2007, VDO introduced ViewLine – a new generation of analog gauges with plug & play installation solution. ViewLine provides maximum freedom to customize the cockpit, great flexibility in installation and design. In 2014, a new member of the ViewLine family was born – the GPS Speed gauge with 110 mm diameter.

2017

New generation of OceanLink®

As OceanLink® round gauges had a great success, we gave them a well-deserved face-lift design. Our new OceanLink® TFT Displays have impressed the market! We are proud to say that we are producing customized TFT OceanLink® displays also for HONDA Marine. In 2017, VDO has likewise presented the new EngineBox which has been designed to be installed in hazardous areas of engine compartments where inflammable gases are present.

Since 01.08.2018, veratron AG has taken over the development, production and sales of VDO Marine products.

AcquaLink® – Timeless instruments. High-quality design.

AcquaLink® realizes state of the art solutions to provide customers with instantaneous, accurate nautical information. The instruments are designed for performance, with ease of use remaining an important attribute. The use of solely premium material, such as mineral glass lenses, guarantees the highest level of reliability and readability, as well as low energy consumption.

All AcquaLink® instruments are lead-free, a token of our commitment to environmental responsibility. In line with this, our production plant is ISO 14001 and ISO 9001:2015 certified. In addition, the timelessly elegantly stylish yet modern design of AcquaLink® displays and gauges provides your cockpit with pleasant clarity. Every component of the AcquaLink® series fulfills highest standards with regard to functionality, design and quality.

*low power consumption
*lead-free instruments

The benefits of using AcquaLink®:

- Maximum precision and the deployment of pioneering technologies are equally important as ease of use and stylish design.
- All AcquaLink® components are made of high class materials, like mineral glass, stainless steel and aluminum.
- All products are manufactured below ISO 9001 certified environment.
- Our plug and play solution design concept offers a high level of installation flexibility.
- A cross-platform standard offers maximum freedom in respect of cockpit customization.
- We ensure seamless integration and optimum utilisation of AcquaLink® devices for extreme conditions at sea.
- Harmonised dashboard look.

NavControl

4.3" TFT Display

TFT Displays

AcquaLink® 4.3" TFT Display

AcquaLink® 4.3" TFT Display

AcquaLink® multifunction TFT Displays are available in 4.3" and 7" sizes. The full 24 bit/16 m colors optically bonded displays feature transmissive layer technology for unprecedented and unsurpassed readability even in direct sunlight. The TFT Display shows a wide array of data received from the AcquaLink® NavBox or NMEA 2000®. Users can customize up to 40 different data pages with single, double, treble or quad grid layouts.

TFT Displays can be daisy-chained with other AcquaLink® gauges, displays or NavControls using the unique VDO Marine Bus or directly connected to the NMEA 2000® backbone (optional adapter cable required) for simple installation on any yacht.

7" TFTs are equipped with capacitive multi touch screens to slide between pages whereas 4.3" displays require the use of a NavControl unit for data input and operation.

- 1x plug with 2x Video Input
- 2x VDO Marine Bus connectors
- Operating temperature range -20°C/+70°C
- Protection level front and rear IPX9K with connectors plugged

Aftermarket package:

TFT Display, Bezel, Silicone Cover, Mounting Screws, Drilling Template, Installation Instructions, Safety Instructions

AcquaLink® 7" TFT Display

NavControl

The NavControl can assume control of any TFT Display connected to the VDO Marine Bus or NMEA 2000® network. Even multiple units can be connected to the same Bus without conflicts.

- Compatible with AcquaLink® and OceanLink®
- 2x VDO Marine Bus connectors
- Operating temperature range -20 °C/ +70 °C
- Protection level IPX6
- Reverse polarity protection
- Telltales light indication

Aftermarket package:

NavControl, Bezel, Silicone Cover, Mounting Screws, Drilling Template, Installation Instructions, Safety Instructions

12–24 V	Black	A2C59501982
	White	A2C3997620001

NavControl

NavControl

AcquaLink® 110 mm Gauges

AcquaLink® 110 mm Gauges feature anti-fog coated mineral glass lenses and LED backlight technology. This allows superb readability in every situation. The gauges can be daisy-chained, using the unique VDO Marine Bus connection or connected to the NMEA 2000® network (optional adapter cable required). The available information provided by the AcquaLink® NavBox or the NMEA 2000® network is indicated by the pointer movement. The AcquaLink® Tachometer is a master up to 16 additional AcquaLink® 52 mm Gauges. These gauges can be connected using the patented EasyLink serial bus.

Specifications:

- 2x VDO Marine Bus connectors
- < 150 mA
- Reverse polarity protection
- Anti-fog coated mineral glass lens
- Protection level IPX6
- Operating temperature range -20 °C / +70 °C

Aftermarket package:

Gauge, Bezel, Rubber Seal, Spinlock, Drilling Template, Installation Instructions, Safety Instructions

Wind

110 mm Apparent Wind Angle 360°

110 mm Apparent Wind Angle Magnified 360°

110 mm Apparent Wind Speed 50 knots

The VDO Marine Wind Gauges display wind speed and angle information received from the VDO Marine AcquaLink® NavBox or the NMEA 2000® data bus.

Range	Voltage	Color	Article number
Apparent Wind Angle			
360°	12–24 V	Black White	A2C59501900 A2C1338770001

Apparent Wind Speed			
0–50 knots	12–24 V	Black White	A2C59501902 A2C1338940001

Tachometer

The VDO Marine Tachometer displays RPM information received from the VDO Marine AcquaLink® NavBox or the NMEA 2000® data bus and distributes additional engine information to optional 52 mm AcquaLink® EasyLink Gauges. With AcquaLink® Tachometers you may monitor up to 4 boat engines via NMEA 2000® or J1939. Easily assign the dedicated engine to the chosen gauge by using VDO Marine Configuration tool or by connected TFT Display.

AcquaLink® 52 mm Gauges

AcquaLink® 52 mm Gauges are connected directly to any AcquaLink® 110 mm Tachometer using the patented EasyLink serial bus connection. Up to 16 EasyLink gauges for each Tachometer can be daisy-chained together.

Giving the customer the possibility to customise the cockpit, AcquaLink® 52 mm Gauges have not included bezel in the packaging. Bezels available are listed in the Accessories section page 62.

Specifications:

- AMP Superseal Easylink connector
- < 100 mA
- 270° pointer deflection angle
- Reverse polarity protection
- Anti-fog mineral glass lens
- Protection level IPX6
- Operating temperature range -20 °C / +70 °C

Aftermarket package:

Gauge, Rubber Seal, Spinlock, Drilling Template, Installation Instructions, Safety Instructions

NavBox

The AcquaLink® NavBox is the core of the AcquaLink® VDO Marine system. It acts as a CPU and signal interface. The NavBox provides a wide range of digital and analog input possibilities. It supports up to four electronic engines (J1939 or NMEA 2000®) or one analog engine. It also features two VDO Marine Sumlog® paddle wheel sensor and one analog VDO Marine Windsensor connections, so legacy VDO Marine products can be used and brought to the digital age.

NavSensor reads following analog data:

- **Engine Oil Pressure**
- **Engine Oil Temperature**
- **Engine Coolant Temperature**
- **Transmission Oil Pressure**
- **Fresh Water, Waste Water and Fuel Level**
- **Voltage**
- **Rudder Angle**
- **Engine Frequency**
- **Battery Current**
- **Pyrometer**

NavBox

It also features a NMEA 0183 input and output port as well as a buzzer output. All received data are converted and sent to the NMEA 2000® network and to the VDO Marine Bus. This gateway function allows displaying engine, liquid level, pressure, temperature and other vital information on any compatible display on the NMEA 2000® network or on designed VDO Marine AcquaLink® gauges or TFT Displays.

The configuration of the NavBox can be done by using an AcquaLink® TFT and NavControl or by using the intuitive VDO Marine diagnostic tool.

- Reverse polarity protection
- NMEA 2000® certified
- LED signal status indication
- Aluminum base plate
- Front & rear side protection rating IPX4
- 3x VDO Marine bus lines
- 1x J1939 CAN bus
- 1x NMEA 2000® bus
- 1x VDO Marine Analog Wind Sensor Input
- 2x VDO Marine Sumlog® Inputs
- AMP Super Seal power input
- 26 pin AUX input (analog signals, NMEA 0183)
- Operating temperature range -20 °C / +70 °C

Aftermarket package:

NavBox, Power cable & fuse, 26 pin auxillary harness with USB interface termination resistors (3 pc.), Mounting Screws, Safety Instructions, Installation and Operation Manual, Drilling Templates

Voltage	Article number
12-24 V	A2C59501979

Installation Example

Installation Example

OceanLink® – Precision CAN instrumentation for leisure boats.

The OceanLink® series focuses on the needs of the modern sports and leisure boats market. It provides a modular instrumentation concept for electronic navigation and engine monitoring with NMEA 2000®, J1939 and analog connectivity. The new product line offers a wide range of functions as well as great flexibility in installation and design.

The OceanLink® series provides three different master instruments as center-pieces of the system: a 4.3" TFT Display, 7" TFT touch Display and round 85 mm master instrument. All instruments are information powerhouses, multifunctional tachometers and have embedded Gateway from Analog or J1939 to NMEA 2000®.

OceanLink® 85 mm Master and TFT Display show various available data (e.g. engine data, depth, course over ground and speed over ground), and send it to all NMEA 2000® devices and to up to 16 additional satellite instruments. All instruments come in a new and stylish design, with perfect to read modern dials.

The benefits of using OceanLink®:

- Easy and effective use.
- Perfectly readable engine monitoring thanks to increased performance presentation.
- The EasyLink data connection and the plug & play solution provide a flexible installation of panel and flush mounting instruments.
- Decades of experience guarantee a fully reliable, modern navigation and engine monitoring system with NMEA 2000®.
- A solid housing design completely sealed against dust and highly water resistant (IPX7 front and rear).
- High quality precision instruments designed in Switzerland.

Further advanced features:

- Master instruments with NMEA 2000® gateway functionality passing on data, e. g. engine data, to NMEA compatible devices.
- Touch screen TFT Display.
- GPS Speedometer, 85 mm, features NMEA 2000® port, which passes the position, COG, SOG data to the NMEA 2000® network.
- Gateway functionality.

OceanLink® TFT Display

TFT Display

The new OceanLink® 4.3" and 7" multifunction TFT Display features a full 24 bit/16 m colors optically bonded display with transmissive layer technology for perfect readability even in direct sunlight. The TFT Display shows and distributes a wide array of data received from NMEA 2000® and J1939 CAN Bus systems and analog sensors directly connected to the display. Users can customize up to 40 different data pages with single, double, treble or quad grid layouts.

TFT Displays can be daisy-chained with other OceanLink® gauges, displays or NavControls using the unique VDO Marine Bus or directly connected to the NMEA 2000® backbone (optional adapter cable required) for simple installation on any yacht.

OceanLink® 4.3" TFT Display

OceanLink® 4.3" TFT Display:

- Optical bonded mineral glass lens
- Front & rear side protection rating IPX7
- 1x NMEA 2000® connector
- 1x J1939
- 2x Analog input
- 1x Frequency input
- 2x 4–20 mA output
- 1x EasyLink data output
- 1x Programmable alarm output 500 mA
- Operating temperature range -20 °C/+70 °C

OceanLink® 7" TFT Display

OceanLink® 7" TFT Display:

- Touch screen function
- Optical bonded mineral glass lens
- Front & rear side protection rating IPX7
- 1x NMEA 2000® connector
- 2x J1939
- 6x Analog input
- 2x Frequency input
- 2x 4–20 mA
- 3x Digital input or 0–5 V
- 2x Alarm output
- 2x Video input
- 2x EasyLink data output
- 2x Programmable alarm output 500 mA
- Operating temperature range -20 °C/+70 °C

OceanLink® 85 mm – Master Gauges

OceanLink® Gauges have a white and black dial version, which is always completed with bezel in identical color. Optional Chrome Bezel is available as decorative accessory.

Specifications:

- 1x NMEA 2000® input
- 1x J1939 and analog input
- Reverse polarity protection
- Anti-fog double layer plastic lens
- Protection rating IPX7
- Operating temperature range -20°C / +70°C

Aftermarket package:

Gauge, Bezel, Rubber Seal, Spinlock, Connection cable, Installation Instructions, Safety Instructions

GPS Speedometer

85 mm GPS Speedometer
0–35 knots/kmh/mph

The new OceanLink® GPS Speedometer features an embedded GPS antenna, an inverted dot matrix LCD and NMEA 2000® connectivity. Up to 20 satellite gauges of 52 mm each, can be connected thanks to the integrated EasyLink connectivity.

Displayed data:

Heading, Depth, Seawater Temperature, STW, SOG, Date & Time, Battery Status, Air Temperature, Engine Oil Pressure, Fuel Level, RPM, Coolant Temperature, Transmission Gear Temperature, Coolant Temperature, Fresh Water Level, Waste Water Level, Trim, Engine Hours, Rudder Status, Booster Pressure, COG

Tachometer

The new OceanLink® Tachometer automatically presents all the key data ranging from oil pressure and fuel consumption to operating hours – on a generously proportioned inverted dot matrix digital display. Besides a CAN interface with NMEA 2000® certified and SAE J1939 data protocol it features two inputs for analog sensors. The innovative EasyLink data connection makes the installation easy and cost effective. Satellite instruments for further dynamic measurement values receive updates from the central instrument every 20 msec.

OceanLink® is available in various designs and a number of bezel color options. The instruments can also be conveniently integrated into customer-specific panel solutions.

The VDO Marine Tachometer displays all important engine related data and distribute it to up to 16 52 mm satellite gauges.

OceanLink® 52 mm Gauges

OceanLink® 52 mm Gauges are connected directly to any OceanLink® Master unit using the patented EasyLink serial bus connection. Up to 16 EasyLink gauges for each Tachometer can be daisy-chained together. OceanLink® Gauges have a white and black dial version, which is always completed with bezel in identical color. Optional Chrome Bezel is available as decorative accessory. OceanLink® accessories are listed on page 62 and 63.

Specifications:

- AMP Superseal Easylink
- < 100 mA
- 270° pointer deflection angle
- Reverse polarity protection
- Anti-fog double layer plastic lens
- Front & rear protection rating IPX7
- Operating temperature range -20 °C / +70 °C

Aftermarket package:

Gauge, Bezel, Rubber Seal, Spinlock, Installation Instructions, Safety Instructions

ViewLine – Easy to install, easy to customize, easy to use.

ViewLine offers a comprehensive modular, modern series of instruments for engine monitoring. More functions and greater flexibility in installation and design increase the scope for high manufacturing standards and guarantee the highest level of reliability and readability.

As the result of ongoing research and development work, we offer an innovative, comprehensive standard instrumentation platform which is also available for outboard

engine use. ViewLine provides maximum freedom to customize the cockpit and is the natural choice for an attractive price/performance ratio.

The benefits of using ViewLine:

- Anti-fog plastic double lens, maximum precision and stylish design with choice of nine various bezels.
- Our plug and play solution design concept offers a high level of installation flexibility for panel and flush mounting instruments.
- A cross-platform standard offers maximum freedom in respect of cockpit customization.
- We ensure seamless integration and optimum utilisation of ViewLine devices for extreme conditions at sea.
- In addition to the standard platform, ViewLine displays and gauges now have solutions to encompass combi and multifunction features.

ViewLine 110 mm Gauges

ViewLine accessories bezel concept offers true design flexibility in the layout of instrument panels. The three attractive designs in black, white or chrome are suitable for every machinery instrument panel or special vehicle cockpit.

Based on the ViewLine housing concept, the cluster provides an ideal IP protection class, a modern appearance and high quality standards.

It provides many parameters in NMEA 2000® and there are several customization opportunities to meet specific customer demands.

Aftermarket package:

Gauge, GPS speed cable, Bezel, Pushbutton for mode and configuration, Rubber Seal, Spinlock, Drilling Template, Installation Instructions, Safety Instructions

GPS Speedometer

110 mm GPS Speedometer
0–12 knots/kmh/mph

110 mm GPS Speedometer
0–70 knots/kmh/mph

Specifications:

- Embedded GPS antenna
- Robust and flexible design for versatile applications
- CAN capability (NMEA 2000®)
- Pointer for analog indication of Speed over Ground (SOG)
- Programmable speed alarm
- Fixed segment LC display
- Flush mount possibility
- Front side protection rating IP67
- Compass for Course over Ground (COG)
- Clock
- 110 mm installation diameter
- 126 mm outer diameter
- 50 mm installation depth
- Reverse polarity protection
- 1x Teltail generic alarm
- 1x Teltail alarm (knots/kmh/mph)

Displayed data:

GPS signal quality, Course over ground (COG), UTC time (optional with external push button), Trip distance (optional with external push button), Trip time (optional with external push button)

ViewLine 85 mm Gauges

The VDO Marine ViewLine 85 mm Gauges are available in black or white dial versions, which are always completed with round bezel in identical color. ViewLine accessories bezel concept offers true design flexibility in the layout of instrument panels. The three attractive designs in black, white or chrome are suitable for every machinery instrument panel or special vehicle cockpit.

Specifications:

- 8 and 14 pole Tyco/Hirschmann bush housing
- Operating voltage 8–32 V
- Accuracy +/- 2.5 % of full scale reading
- < 175 mA current consumption with an LED warning light as standard

- Number of pulses programmable via dip switch or PC software (ViewLine programming tool)
- Anti-fog double lens
- Protection rating front IP67, rear IP52
- 85 mm installation diameter
- 50 mm installation depth
- Operating temperature range -20 °C / +70 °C

Aftermarket package:

Gauge, Bezel, Rubber Seal, Spinlock, Connection cable, Installation Instructions, Safety Instructions

Speedometer

Speedometer

NMEA 2000® Products

MediaBox

The VDO Marine MediaBox can be mounted literally everywhere on the boat. Listen to radio and weather forecasts with its built in AM/FM Tuner or connect a MP3 player or smartphone via USB or Bluetooth to enjoy your favorite music. The MediaBox is NMEA 2000® certified and can be used with the VDO Marine AcquaLink® and OceanLink® TFT Displays. Additionally VDO Marine offers a free VDO Marine MediaBox App for your smartphone so the MediaBox can be used as a stand-alone radio.

- AM/FM radio tuner with RDS
- Bluetooth audio player with 50 m range
- USB input
- Equalizer with volume control
- Power amplifier 4x 28 W (D class)
- NMEA 2000® certified
- IPX5 protection rating
- Operating temperature range -20 °C/+70 °C
- Free VDO Marine MediaBox App

MediaBox

Aftermarket package:

MediaBox, Cable Harness, Mounting Screws, Installation Instructions, Safety Instructions

Voltage	Article number
9–16 V	A2C59501980

VDO Marine MediaBox App:

Accessories

- Diameter: 130 mm
- Installation depth 50 mm
- IP55 protection rating

Aftermarket package:

2x Speaker, Rubber Seal, Mounting Screws, Installation Instructions, Safety Instructions

Marine Speakers

Marine Speakers

Output power	Article number
150 W	A2C1856150001

EngineBox

EngineBox

The EngineBox expands the possibilities of the NavBox for multi-engine applications or can be used as stand-alone when navigation information is not required. The EngineBox has a NMEA2000® and a J1939 CAN port. The EngineBox can also be used on older, completely analog engines, thanks to the analog input ports provided and designed for: RPM data, 0–400 Ω sensors and 4–20 mA sensors.

EngineBox is available in 2 versions: Single Engine and Dual Engine. The Dual Engine version is designed with double frequency and resistive inputs. This allows customers simplified installation wiring, reduced commissioning time and the required installation space.

The EngineBox has to be set up using an intuitive PC configuration tool making it easy for programming the inputs (delivered free of charge). The EngineBox is designed to be installed also in hazardous areas (for additional information please check the technical characteristics described in the installation manual).

- Analog to NMEA 2000® gateway
- J1939 to NMEA 2000® gateway
- 2 models for single engine and dual engine configurations
- Compact design
- Status LED

- 1x J1939 (2x J1939 Dual Engine)
- 1x M12 5 pins NMEA 2000®
- 1x Input 0–4 kHz for RPM (2 inputs with Dual Engine Model)
- 4x Inputs 0–400 Ω (up to 8 Inputs with Dual Engine Model)
- 2x Inputs 4–20 mA
- 1x Input 0–5 V (2 Inputs with Dual Engine Model)

Aftermarket package:

EngineBox, Cable Harness, Safety Instructions

	Article number
Single Engine	A2C1824820001
Double Engine	A2C1767000001

NavSensor

The multifunctional AcquaLink® NavSensor is the gem of all sensors. The inertial sensor complements the inbuilt satellite GPS receiver module to provide accurate readings of the speed of travel as well as the pitch & roll (up and down). Compass readings can be displayed electronically thanks to the embedded compass, which also facilitate course corrections in electronic autopilots. The barometer and air temperature sensors are early indicators of forthcoming weather conditions.

NavSensor

- NMEA 2000® certified
- IPX6 extended protection rating
- GPS Module: Position, time, boats vector, signal quality, satellites
- Compass: +/-40° tilt angle, <2° accuracy, alarm (rapid field strength change, tilt angle overrun, undervoltage condition)
- Barometer: Air pressure, air temperature sensor
- Operating temperature range -20 °C/+70 °C

Aftermarket package:

NavSensor, 2x brackets, Installation Instructions, Safety Instructions

Voltage	Article number
12–24 V	A2C59501981

NMEA 2000® Wind Sensors

The wind vane turns in the direction of the wind and steers the wind direction gauge. The wind cups record the relative wind speed which in turn is displayed on the wind speed gauge.

NMEA 2000® Wind Sensor

Voltage	Article number
9–16 V	A2C59501984

NMEA 2000® Triducer Sensors

Through-hull 100 W plastic Airmar triducer provides depth, speed and seawater temperature data. Sensor is NMEA 2000® certified and operates up to a depth of 330 feet and at frequency of 235 kHz.

NMEA 2000® Triducer Airmar Sensor

Voltage	Article number
9–16 V	44-196-2-01

Navigation Kit and Navigation Kit Plus

Complex boats need a smart solution. And we have it. VDO Marine OceanLink® display is the only product on the market able to interpret CAN, NMEA 2000® and analog signals without any additional external device.

Safety, performance, entertainment

Are you looking for a complex boat system for a simple installation on a yacht? VDO Marine Navigation Kit and Navigation Kit Plus is the solution! Our Navigation Kits will become essential crew members which ensure you top performance in the open sea, even in the most extreme situations.

All in one box

All you need is in one box including wiring harness and terminators. All products are REACH and RoHS compliant and NMEA 2000® certified.

Navigation Kit and Navigation Kit Plus

Wind Sensor

The wind vane turns in the direction of the wind and steers the wind direction gauge. The wind cups record the relative wind speed which in turn is displayed on the wind speed gauge.

NMEA 2000® Wind Sensor

NMEA 2000® Triducer Airmar Sensor

Through-hull 100 W plastic Airmar triducer provides depth, speed and seawater temperature data. Sensor is NMEA 2000® certified and operates up to a depth of 330 feet and at frequency of 235 kHz.

NMEA 2000® Triducer Airmar Sensor

OceanLink® TFT Display 4.3"

The multifunction TFT Display is NMEA 2000® certified and features a full 24 bit/16 m colors, optically bonded display with transmissive layer technology for perfect readability even in direct sunlight.

NMEA 2000® accessory

Cables, terminators and connectors enable easy connection of all components to the NMEA 2000® network.

NavSensor (Included only in VDO Marine Kit Navigation Plus)

The multifunctional NavSensor is the gem of all sensors. The inertial sensor complements the inbuilt satellite receiver module to provide accurate readings of the speed of travel as well as the pitch & roll (up and down). Compass readings can be displayed electronically thanks to the embedded compass, which also facilitate course corrections in electronic autopilots. The barometer and air temperature sensors are early indicators of forthcoming weather conditions.

Analog Sensors

Sensors for electronically controlled safety functions are the eyes, ears and the antenna of a modern-day high-tech vehicle. Nothing escapes them – neither the smallest temperature deviation inside cooling systems, nor the monitoring of engine and gear oil temperature.

Intelligent safety systems are inconceivable without them. Over the past 60 years, we have continuously refined and perfected our sensors that now have reached an utmost degree of precision.

Sumlog® Transducer

Sumlog® Transducer

The Sumlog® Transducer is required to measure boat speed through water. The Sumlog® includes two paddle wheels which can be exchanged to match the speed range of the boat, thereby supporting speeds from 0 to 18 or up to 50 knots respective of the installed paddle wheel. The NavBox supports up to two Sumlogs® which can be directly connected to the dedicated Sumlog® ports using a 4 pin M12 connector extension cable.

Aftermarket package:

18 knots Sumlog® Transducer, additional 50 knots Paddle Wheels, Valve, Plug, 2x Rubber Seal, Installation Instructions, Safety Instructions

Voltage	Article number
12–24 V	A2C59501986

Analog Wind Sensors

Analog Wind Sensor

The legacy wind vane turns in the direction of the wind and steers the wind direction gauge. The wind cups record the relative wind speed which in turn is displayed on the wind speed gauge. Also compatible with VDO Marine ‘Standard’ & ‘Logic’ series.

12/24 V	2–90 Ω	150–600 mm	N02-240-106

Fuel Level Sensor

Deep-Pipe Level Sensors

Deep-Pipe Level Sensor

Deep-Pipe Level Sensor is ideal for usage in fuel tanks. Its 38 mm diameter vertical tube contains a float inside, which measures a level of the liquid. Small holes at the top and bottom of the tube act as a baffle to fuel sloshing around in the fuel tank, so the float position remains stable at any sea state. Sensors are made in various lengths starting at 150 mm increasing to 1200 mm – please ensure that the length chosen is at least 4 mm from the base of the fuel tank once fitted.

- TE Superseal Connector IP67
- Compensation chamber
- Flange: PA66 GF30
- Wiring harness with length of 200 mm
- 3 Signal ranges: 90–4 Ω , 0–180 Ω , 240–33 Ω ,
- Length: 150 mm–1200 mm
- Mounting diameter: 54 mm
- IP67 protection rating
