

Product: Tachometer	Description Ocean Line Tachometers on Crusader 8.1L Engines	Date Apr-99
Type: Electric		1

For applications involving Crusader 8.1L gas engine and Siemens VDO Ocean Line N02-012-130 tachometers, there is a potential problem with the tachometer signal emitted by the engine causing the reading on the tachometer to be erratic, to drop out at higher RPMs, or both.

A solution to this problem is to use tachometer N02-012-194, which has additional filtering in the software to enable it to read the tachometer signal emitted by Crusader 8.1L engines more effectively.

Both tachometers are part of the Ocean Line.
